

February 26, 1975

should go into it blindly. If you vote for this, in affect, you are voting for it as a long range program. I think Senator Koch said this when he got up and supported the measure. Those are my comments. I do not know how this Legislature solves its spending problem in regard to a perspective when bills are scattered all over the place. I don't really think it does any good to stand here or sit here and bracket them. We've tried that before and that simply encourages pork barrelling. You vote for mine, I'll vote for yours. But, you as a legislator, Senator Cope, have this problem. You got the budget bills that are going to come in and as you wait for those you have these other bills coming 'n and you have to figure out what's first priority, what's second, what's third, etc. It's a very tough job. In this case you vote for this, in my opinion, you're voting for a long range program. I think there are other problems that are more important at the moment than this, but then that's the job of those who sit here and that's why you are elected. That's why I stand up and explain my position and explain the problem that the Legislature has.

PRESIDENT: Senator Keyes.

SENATOR KEYES: Mr. Speaker, I'd like to ask Senator Burbach about 2 or 3 questions. Senator Burbach, in the past this has been paid for wholly by the Federal government. Am I right?

SENATOR BURBACH: This is correct.

SENATOR KEYES: Now as we are progressing here today then are the N.R.D.'s going to be working with the Federal government and financing part of it and helping them with the survey or not? As it is now without this bill?

SENATOR BURBACH: I know they are working together but I don't know . . . and I'm sorry I cannot answer you whether they are putting any money into match a share or cross-share . . . match it. I'm sorry I do not know.

SENATOR KEYES: Well Senator Burbach it would be awfully hard for me because of the fact that by the Federal government Sarpe and Douglas and several counties have been completely finished. It would be awfully hard for me to come out and vote against the state doing it but I'm very much affraid I will do so this year. We had this bill last year in committee and held it and didn't pass it out.

SENATOR BURBACH: Oh, yes we did. It was here on the floor . . . and because of the 60 day session it was not completed, otherwise we would have had a program started now. As I indicated . . . I so firmly convinced . . . that I know that in the foreign, countries that are coming to the front which are trying to produce more food for the hungry people in the world, one of the first things that they do is a land survey. This
